PROJECTS

RealEstate CRM — GitHub / Live Link
- Developed a complete web app using Spring Boot, Spring MVC, and Thymeleaf to manage real estate properties, customers, and team members.
- It includes login with error handling, covers edge cases, and helps agents keep track of everything in one place.

EduHub — GitHub Link
- Built a fun and easy-to-use learning website using React and Redux. It includes a live code editor, step-by-step lessons, coding tests, and smart quizzes that give feedback.
- The backend was made with Node.js and MongoDB to keep everything running smoothly.

E-Gate Pass — GitHub Link
- Created a mobile app to manage gate passes for students using React Native. It sends email updates, tracks students' locations, and stops tracking when parents confirm they've arrived safely.
- Used secure login with JWT and made sure the app runs fast and safely.
